

## THE ORGANIZATION OF SELECTIVE INSPECTION OF INNOVATIVE ACTIVITY OF SMALL ENTERPRISES

© 2009 L.R. Mukhametova\*

**Keywords:** innovative activity; reporting forms; a small enterprise; selective supervision; sample planning; indicators of innovations; questionnaire.

The concepts of investment activity, investments, small enterprises, and also toolkit of carrying out of selective supervision of investment activity of small enterprises are considered in the article.

Innovations are considered as a way of increasing production competitiveness both in domestic market and abroad; the updating of the out-of-date industrial equipment, the growth of demand for highly skilled personnel which has been superseded from the workplaces in connection with sharp curtailment of production.

In concept "innovative activity" contains: scientific and technical activity, organizational, financial and commercial is also the major component of the promotion of innovations to consumers. Scientific research and projects being a source of new ideas are carried out at various stages of innovative process.

The statistics of innovations is published in Russian statistical year-book, and also in "Industry of Russia" collection. Other regular source of statistical information on innovations is quarterly selective inspection of innovative activity of industrial enterprises.

Federal statistic reporting is represented by the following basic forms of state statistic supervision:

◆ form № 2 - science: "Data on performance of scientific researches and workings out";

◆ form № 4 - innovation: "Data on innovative activity of the organization";

◆ form № 1 - technology: "Data on creation and use of advanced industrial technologies";

◆ form № 2 - MT an innovation "Data on technological innovations of small enterprise (organization)".

Private sector and small-scale business development is one of the major indicators of the productivity of transformation processes and reforms in the countries with transitive economy.

Selective supervision over the subjects of small businesses (business supervision) has been accomplished since 1996. The analysis of inspection results allows to reveal the features of the development of small business in Russian economy and its innovative activity, to define its share in basic macroeconomic indicators.

Selective statistic supervision is carried out at two levels: federal and regional.
